PROFILE

I am currently a sophomore at Vietnam National University - Ho Chi Minh City University of Science, major in Information Technology. University is an open, dynamic environment that allows me to maximize my passion in the field of information technology, be exposed to interesting majors, hone my knowledge and help clearly define my career path.
I am an active student, eager to try my hand at different areas, interested in learning new things. Therefore, in the past year at the University of Science, I not only participated in academic competitions in information technology but also actively participated in clubs and extracurricular activities.
